

DIGITAL INVITE LIGHT P.F.

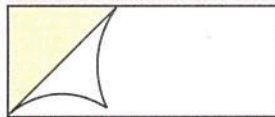

DIGITAL INVITE LIGHT P.F. is a mixed PU/COPES film, 90 microns thickness on a slightly adhesive polyester support. It allows you to print and cut small details and gives also the opportunity to re-attach small parts before heat-transferring onto cotton or polyester fabrics through the use of our special application tape. This material is recommended for easy and speed cutting and peeling.

RECOMMENDED FOR FAST WORKS!

CERTIFIED OEKO-TEX

Articles 30m matt
available in width:
50cm - 75cm - 150cm
